Machinoweb (Website)

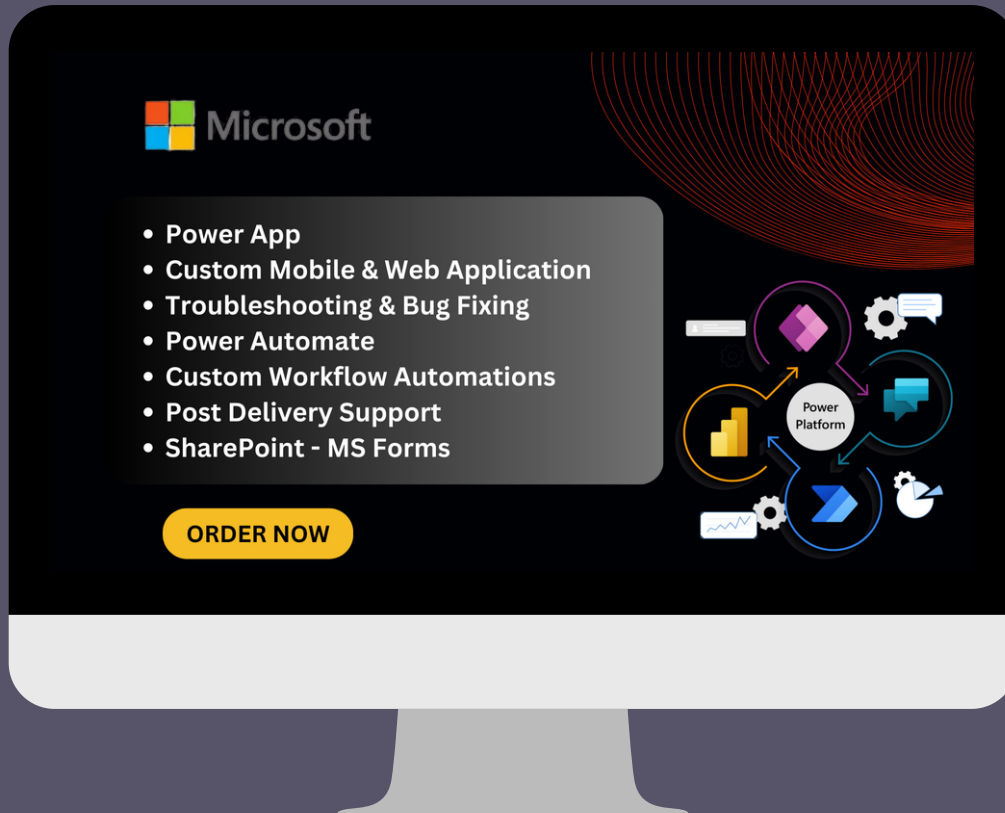

Textile Institute of Pakistan (Website)

Mazaya Holding (SharePoint)

MAA International Microsoft Platform

Mazaya Holding Microsoft Platform

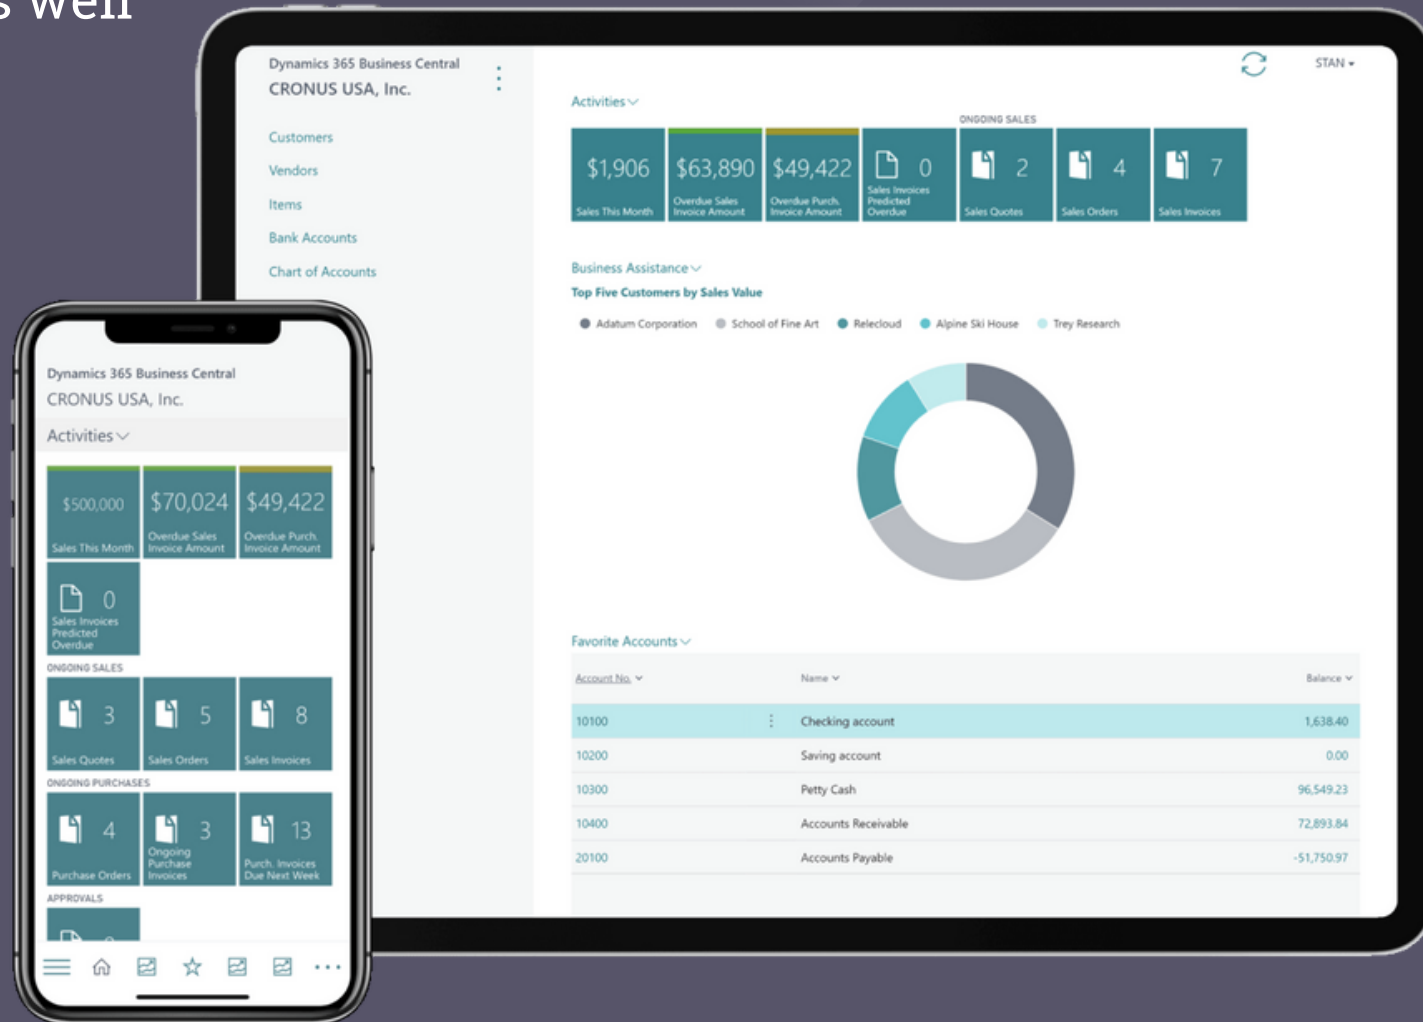

DTS has developed the procurement for Mazaya Holding by using the Microsoft SharePoint Online application below are some key features:

- Used SharePoint Lists and managed by JavaScript, jQuery and APIs.
- For Approvals, Email, etc. used Power Automates.
- Due to the limit of SharePoint classic version managed data threshold
- For Building Maintenance activities used SharePoint Modern List, Power App, and Power Automate for tasks management.
- Developed Intranet Website using web parts for Internal messaging, Events, Active Projects links, Websites, Social Media, Region, Etc.
- To Building Maintenance activities used SharePoint Modern List, Power App, and Power Automate for tasks management.
- Managed documents in a SharePoint Document Center using classic lists and document libraries. Developed custom functionalities with JavaScript and jQuery to enhance document handling. Automated approval workflows and document handovers to the document controller using Power Automate.
- Managed Active Directory integration in the Intranet using the People Search Web Part for efficient user search and directory management.
- External Users: Manage external users for a limit time
- Viva Connection on team for Intranet website

Microsoft Dynamics 365 Business Central

- Consultant can be available on-site
- We provide expertises and training on-site as well
